Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the invention in this application and May are directed towards the same core concept. However, the invention in this application differs a great deal in term of actual implementation and details from the May's teaching. For instance, the details relating to claim 6, last 2 full paragraphs are not explicitly disclose in the May 's reference and the same comment applies to claim 10, last 7 lines; claim 61, last 10 lines; last paragraph of claim 14 and last three paragraphs of claim 19. With respect to claim 24, the structure of the envelope generator, as claimed, is not even disclosed in May's reference. In other words, in combination with the other claimed features, May does not explicitly teach an envelope generator comprising a complex summer coupled to the first Nyquist filter and the threshold generator and associated details; a discriminator coupled to the said complex summing circuit and a second Nyquist filter and associated details. With respect to claim 55, May does not explicitly teach a "combining circuit coupled to said pulse spreading filter, said off-time constrained envelope generator and said on-time constrained envelope generator". The limitations indicated above, in combination with the other claimed limitations are not anticipated or rendered obvious by the May's teachings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
